

Aquanir BATH

English translation of manufacturer TDS | Original revision: 07/2023

PRODUCT DESCRIPTION

Water-based acrylic matte paint developed with USP technology for a smooth and uniform appearance on walls in bathrooms, kitchens and humid rooms, for prevention of mold and fungi. Intended for interior walls. Provides particularly high coverage and excellent hiding, is washable and easy to clean without damaging the paint texture, is easy and user-friendly to apply, durable and shade-retentive. Aquanir BATH carries Israeli Standard 809.

USES

Interior walls in bathrooms, kitchens and other humid rooms where resistance to mold and fungal growth is required.

SURFACE PREPARATION

Remove mold and fungal stains using bleach, rinse with clean water and allow to dry completely. Repair defects, if any, with Nirlat Rockbond / Gold Bond / Proximo+. After repairs and complete drying, apply Aqua Primer.

DRYING

Touch dry: approx. 1 hour. Between coats: approx. 2 hours. Final drying: 24 hours. Values stated for 25°C and approximately 80% relative humidity.

APPLICATION INSTRUCTIONS

Stir well before use and apply two coats by roller, brush or airless spray. For optimum results, in addition to painting the room with Aquanir BATH, ensure constant ventilation of the room.

DILUTION

Dilute with water up to 30%, according to substrate and coat.
